90” x 40” Oval Banqueting Table

SKU: FN-BQT-90OVL
Category: Tables, EventPro® Series, Banqueting Tables
Condition: New

£179.95 ex-VAT

Description

90" x 40" Oval Banqueting Table

An oval banqueting table measuring 229cm long by 102cm wide (90 x 40 inches), with an 18mm plywood top and brown hammer powder-coated folding steel legs. The oval shape seats 8–10 guests while creating wider walkways than a rectangular table of equivalent capacity. Catering staff can circulate and serve without asking guests to move their chairs.

The table stands 76cm tall, matching standard banqueting height. The 18mm plywood top provides a rigid, flat surface that supports heavy centrepieces and full table service without bowing. The folding steel legs lock into position and collapse flat for storage and transport.

The Oval Advantage

Rounded ends eliminate sharp corners in tight venue spaces. Guests seated at the ends of a rectangular table often feel isolated from the main conversation. The oval brings those end positions closer to the group and creates a more sociable seating arrangement. You get the linear capacity of a long table with the conversational benefits of a round.

For catering operations, the curved ends mean servers approach from any angle without catching hips or trays on protruding corners. In marquee environments where tables run close together, the oval creates natural flow paths between rows.

Typical Uses

Large hospitality events use the 90" oval for VIP dining areas where the table shape itself signals a premium seating arrangement. Corporate galas deploy them for board-level guests. Wedding planners use them as top tables where the couple and their party sit in a curved arrangement that faces the room.

The 102cm width provides generous surface area across the short axis, accommodating place settings on both sides with a central strip for decorations, candles, or shared platters.

Storage

The folding legs bring the table to a flat profile. Store on edge or flat-stacked. The oval shape means these tables do not interlock as tight as rectangular tables on transport, so allow a little more van space per unit.

Buying in Bulk and Layout Control

Buyers choose the 90 inch oval when they want the seat count of a long table but need softer room lines and cleaner walkways. In a 100 person room, ten tables of ten can create a dense grid if you use large rounds or wide rectangles. Oval tops can open extra space at the corners, which helps staff hold service routes and guest access. Venue teams still need to check chair pull back, aisle width, and exit clearance on a scaled plan before they commit

to a full purchase. For ballrooms with pillars or marquee legs, the oval often solves awkward gaps without leaving dead floor space.

Bulk orders also need transport planning. These tables fold flat, yet the curved ends reduce the tight nesting you get from a run of rectangles. Buyers who order 30 or 40 often add storage trolleys or dedicate a wall bay so staff can roll and count stock by event zone. In loading plans, crews should allow room for the wider arc at each end and strap stacks so tops do not shift against each other on corners.

Pairing Suggestions and Event Types

This format pairs well with Chiavari chairs for wedding top tables, with padded banqueting chairs for hotel dining, and with black conference chairs for board dinners or hosted discussions. Florists and stylists like the longer centre line because it takes foliage runs, candles, and shared platters without crowding the end guests. Corporate hospitality teams use ovals for sponsor hosts, speakers, and senior guests. Councils and universities use them for graduation suppers, donor events, and civic dinners where the room needs a formal look without the hard corners of a long rectangle.

Planners can also place one or two ovals in a room of rounds to mark the top table or VIP section. That mix keeps the room balanced and gives photographers a focal point at the head of the space. Caterers often pair the oval with 6ft rectangular buffet tables and with small 4ft rectangular support tables for glassware, coffee, or service equipment behind a screen.

Maintenance, Use, and Working Life

Staff protect the curved ends by lifting with two people and by setting the table down on level ground before they open the legs. Most cosmetic wear appears where crews pivot the top through store room doors or rest it on rough floors. A cloth cover during storage reduces rub marks, and foam between stacked tops helps preserve the edge. After each event, staff should wipe spills, dry the underside, and check that the leg locks sit flush before the next load out.

The 102cm width gives diners more centre space than a narrow rectangle, which suits formal service and shared platters. Buyers still need to spread heavy decorative items with care and to avoid loading one end with ice buckets or stacked plates. In use, the oval shape helps guests at the ends join the same table conversation as the guests on the sides. Teams that plan storage, train crews, and rotate stock can keep this shape in front line service through many event seasons.

Top material: 18mm plywood
Leg finish: brown hammer powder-coated steel, folding
Dimensions: 229cm L x 102cm W x 76cm H (90" x 40" x 30")
Seating capacity: 8–10 guests
Use: indoor
