Chair Trolley

SKU: TRL-STK-CHR
Category: Equipment, Free Shipping
Condition: New

£129.95 ex-VAT

Description

Black powder-coated steel tube at 1.8mm wall thickness. The carpet-lined base protects chair frames from scratching against bare steel during transit, which saves visible wear on the chairs over a busy hire or conference season. At 71cm wide and 62cm deep, it fits through standard double doors and into service lifts with chairs loaded.
Sized for standard UK stacking and banqueting chairs. The 1.8mm frame is heavier gauge than most budget-end trolleys, which matters when you are loading and unloading 20 or more chairs repeatedly across a season.
