EventPro® Series Eames Style Chair – Red

SKU: EAMCHAIRRED
Category: Chairs, EventPro® Series, Free Shipping, Eames Style Chairs
Condition: New

£29.95 ex-VAT

Description

EventPro® Series Eames Style Chair – Red

A moulded polypropylene shell chair on solid beech wood legs with reinforced steel fixings. Red shell. The chair weighs 3kg, supports up to 120kg, and stacks 4 high. Rubber feet protect floor surfaces. Dimensions: 45.5cm wide, 51.5cm deep, 82cm tall.

The red shell paired with natural beech legs creates visual impact that suits brand activations, Christmas events, themed parties, and any occasion where furniture contributes to the energy of the room. Red commands attention without the informality of orange or the aggression of black.

Construction

The polypropylene shell is injection-moulded in a single piece. No seams, no joints in the seating surface, no upholstery to tear or stain. The material resists impact from stacking and transport, handles spilled drinks without absorbing, and wipes clean with a damp cloth.

The solid beech wood legs connect to the shell via reinforced steel fixings that distribute load across multiple attachment points. Beech provides the hardness and grain consistency needed for furniture legs that endure thousands of use cycles. The natural timber softens the red shell, preventing the colour from reading as industrial or institutional.

Stacking

The chairs stack 4 high. The shell geometry nests so stacked chairs occupy minimal additional height per unit. Rubber feet prevent sliding on smooth floors.

The Red Shell

Red carries strong associations: Christmas, valentines, brand loyalty, celebration. It suits December corporate parties, retail brand launches, food and beverage company events, and award ceremonies where drama matters. In event photography, red chairs create striking compositions against white tablecloths and silver centrepieces.

Use red throughout a room for total commitment, or scatter red chairs among black or grey for measured bursts of colour that guide the eye to specific areas.

Part of the EventPro® range. Trusted by the BBC, ITV, HSBC, Cambridge University, and used at the Commonwealth Games.

Buying in Bulk

If you are buying 50, 100, or 200 chairs, plan around the four high stack. Four chairs sit in one stable stack, so your team can count stock at a glance and clear a room without loose piles. A venue team fitting out a 100 seat café or

staff canteen can hold 96 chairs in 24 stacks, then keep four spare chairs for damage cover or late growth. Buyers who run roadshows, council venues, school dining rooms, and student hubs often order in batches of 40 or 80 so each site keeps matching stock and spare units.

You can pair this chair with white tops, black tops, oak tables, or compact café tables from the EventPro® range. The red shell lifts plain table linen and gives black frames a warmer feel. If you are dressing a Christmas room, you can mix red chairs with white linen and brass details. If you are fitting a staff dining room or breakout space, you can use red on feature rows and keep white or black on the rest of the floor.

Layout Planning

You can seat four guests around a 120cm round table, five around 150cm, and six around 180cm if your service team needs more elbow room. Event planners setting a 100 person dining room often use ten rounds of ten, or split the room into smaller zones with café tables and loose chairs. Keep at least 1.2 metres for main aisles, and leave a clear route to fire exits, doors, and service points. If guests need wheelchair access, hold wider gaps on corner tables and keep spare chairs off the floor until the plan settles.

The 120kg load rating matters in day to day use because buyers need chairs that stay steady under a wide range of guests, not just a narrow test group. The steel fixings spread load from the shell into the timber base, so guests feel less sway when they shift weight or lean back. The 3kg unit weight helps your crew carry stacks without strain, yet the chair still feels planted once you set it down.

Care and Service Life

Staff can wipe the shell with warm water, mild soap, and a soft cloth after each event or meal service. Dust and grease show first around the seat edge and the join under the shell, so cleaning teams should check those points during reset. Do not drag loaded stacks across rough concrete because that wears the feet and puts shock through the fixings. If your team stores the chairs dry, checks fixings during stock counts, and uses trolleys for moves, you can expect years of use in cafés, schools, galleries, and corporate sites.

Shell: moulded polypropylene, red
Legs: solid beech wood with reinforced steel fixings
Dimensions: W45.5 x D51.5 x H82cm
Weight: 3kg
Load capacity: 120kg
Stacking: 4 high
Floor protection: rubber feet
Part of the EventPro® range

This chair ships free by courier. Add it to your basket and the price stays the price. No delivery charge gets added at checkout.
