Folding Chair Trolley

SKU: TRL-FLD-CHR
Category: Equipment, Free Shipping
Condition: New

£169.95 ex-VAT

Description

Galvanised steel throughout: 25mm round armrests at 2.0mm wall thickness, welded crossbar, and a 25 × 50mm rectangular base pipe at 1.2mm. The welded crossbar keeps the frame rigid under a full stack of folding chairs. At 94cm wide and 173cm tall it takes most standard folding chair sizes without needing to angle them in.
The 125mm caster wheels roll across carpet and hard floors under load without excessive effort. Galvanised construction suits the damp storage conditions common in venue back-of-house and covered outdoor areas where painted or powder-coated steel corrodes.
